

i want a ssketch for an eagle in canva

You can get an eagle **sketch** in Canva either by using ready-made graphics or by turning a photo into a sketch.

Option 1: Use eagle sketch graphics

1. Open Canva and create a new design (any size you want, like Instagram post).
2. Click "Elements" on the left, then in the search bar type "eagle sketch" or "eagle line art" or just "eagle."^[1] ^[2]
3. Pick a black-and-white or line-art style eagle from Graphics, then place it in the center.^[1]
4. Adjust size, rotate slightly, and change the color of the lines if you want (e.g., dark brown or navy).^[1]

Option 2: Convert a photo to sketch

1. Find or upload an eagle photo into your Canva design.^[2]
2. Select the photo, click "Edit image," then choose a sketch or "Photo to Sketch" effect if available on your account.^[3]
3. Apply the effect and tweak intensity, brightness, and contrast until it looks like a pencil sketch.^[3]

Option 3: Draw your own eagle

1. Create a blank design, then go to Canva's Draw tool (Draw app) if it's enabled for you.^[4]
2. Choose a thin black pen or pencil brush and lightly draw the eagle's head and beak, then wings and body as simple shapes first.^[5] ^[6] ^[4]
3. Go back over with darker strokes to add eye, feathers, and outline, keeping it simple and sketch-like.^[6] ^[5]

Tell me if you want a specific style (realistic, tribal, logo-style, tattoo-style, etc.), and I can give you exact search words and layout ideas.
